This book helped my four-year old.

By Julie Bauer

My 4-year-old son is very bright and imaginative, but has a hard time focusing on tasks -- as a result, his small-motor skills were beginning to lag behind. This workbook helped him develop skills in drawing shapes, solving puzzles, and beginning to write letters.

The workbook has bright pictures and a variety of activities. Parents (or kids) can choose to skip around the book if the child gets tired of one kind of activity. We chose to work straight through, stopping whenever he got tired or frustrated. The activities are challenging but not impossible.

One caveat -- are preschoolers really expected to know how to write the alphabet in upper and lower case? They learn how in this book, but I seem to remember taking that up in the first grade, oh a million or so years ago.

fun, but frustrating

By Jane Manning

My son was almost 4 when we got this a couple of months ago, and he really likes it (still does), but it's a bit frustrating in the following way: many of the pictures that it uses for learning letters (e.g. "circle the picture that begins with u") are of vocabulary items that 4 year olds don't necessarily know. E.g. for "u" they had a batter and someone who I guessed was an umpire. But my 4-year-old doesn't know what an umpire is, even though he's cognitively just at the right level for this book in the sense that he finds it fun to do, and when he knows what the pictures are he can pick the right one. Another page had a frilly heart as one of the choices for "v", and you were supposed to know that the heart was a valentine. My kid has a pretty big vocabulary for a 4-year-old, and knows the word valentine, but it just was a little abstract for him. The result is that I have to help him a lot, and I think it'd be more fun for him if he felt he could do it himself. If anyone knows of a similar book with more age-appropriate vocabulary pictures, it'd be great if they could post that in a review, since he does really seem to enjoy the activities in the book, and views getting to do the book as a treat.

Highly Recommend for Pre-K

By Ursula K. Raphael

My son just turned three in August, but he has already completed this book. We did a few pages everyday - I think we spent a couple of months on it. He is now able to write upper and lowercase letters, and can do simple math concepts, such as greater vs. lesser, which group has more...there are mazes, coloring activities, and a variety of lessons to teach shapes, sizes, counting, writing, etc.

What I liked best about this book is the different phrases that they use in the instructions. My son learned the relationship between phrases "which ones match" and "where does it belong", "which one is different" and "which one is not the same"...just to name a couple. My son immediately applied what he learned from the book to his everyday activities, so I know that he did absorb some, if not all, the lessons.

Since this book is a combination of smaller books from School Zone, it's not necessary to buy the others unless your child has trouble with a particular area. My son struggled with the pages dealing with "beginning sounds," so I bought him the book that is just activities to teach beginning sounds.

I prefer School Zone to all other preschool workbook series, with the exception of Kumon.
