Helpful in limiting amount of notes that need to be taken

By A Customer

This series of books is very helpful and full of information that the huge textbooks have but very condensed. Great to make additional notes in the margins that the textbook deems is necessary information to acquire.

Lippincott's Review Maternal/Newborn

By Jack Erickson

Excellent nursing supplemental reading, the questions are very important to study, Many of the questions in the book could be on the nursing classroom exams. The rationale are very important to know which are included.

Terrible information regarding breastfeeding

By Elizabeth

The material in this book regarding breastfeeding is down right horrible. Nursing mothers and babies deserve practitioners that have more knowledge about breastmilk and breastfeeding that is factual. The advantages and disadvantages listed comparing bottle feeding to breastfeeding is ridiculous, subjective and contradictory. If you are studying to work with new moms or newborns, please research this subject matter to

enable you to give the best information to your clients.
