The Future of IT Training?

By Bill Becker

Ron Davis clearly knows his stuff. His videos provide the normal lecture of an instructor-led class, along with demonstrations and then step-by-step instructions on how to accomplish a specific task. With over 70 videos averaging approximately 10 minutes each, these self-paced courses are perfect for "just in time" learning to help gain knowledge of a new technology. Think "bite size" learning modules that could literally be viewed during a lunch break or right before you watch your favorite TV at night. No more excuses (cost or time!) not to be on top of your game when it comes to acquiring new IT skills.

I learn better when hearing a presentation rather than seeing a demonstration on the presented subject. This author did a great job of doing just that!
