Never mind to be puzzled where to obtain it. As the various other, we share the connect to check out as well as download the soft file ebook *The Homemade Workshop: Build Your Own Woodworking Machines And Jigs By James Hamilton, Stumpy Nubs* So, you might not bring the published book [The Homemade Workshop: Build Your Own Woodworking Machines And Jigs By James Hamilton, Stumpy Nubs](#) anywhere.

THE HOMEMADE WORKSHOP: BUILD YOUR OWN WOODWORKING MACHINES AND JIGS BY JAMES HAMILTON, STUMPY NUBS PDF

Let's face it: Woodworking isn't cheap. Wood and materials alone can cost a small fortune. And well-designed commercial woodworking machines are often so expensive that they are beyond the reach of many home woodworkers. So what's a woodworker to do? Do what Stumpy Nubs does and build your own!

In *The Homemade Woodshop*, James Hamilton, creator of the popular Stumpy Nubs website, shows you how to build woodworking machines for a fraction of the cost of store-bought models – and with more features to boot! You'll discover 12 detailed projects for building precise, durable shop-made machines including:

- Sliding-top router table that makes joinery safe and easy
- Multi-function downdraft table that combines dust collection with countless workholding applications
- Sliding crosscut table that gives your table saw the precision and convenience of a high-end European saw
- 24" band saw that offers all of the throat capacity of an industrial model in a size that will fit on a benchtop
- Crosscut "super-sled" that allows you to create box joints, splined miters, tenons and more
- Table saw workstation that affords you a complete workshop in a 4' x 8' footprint
- And 7 more!

The projects in this book not only save you money, but they allow you to add more features and, ultimately, greater precision and more versatility to the machines in your shop. And let's face it: Having a shop outfitted with machines that you built yourself is just cool.

Amazing.

By BW

I'd never heard of Stumpy Nubs before attending a woodworking show in September in Kansas City. I found his presentation to be the most interesting, entertaining and enjoyable of all those I attended. He actually

brought his shop-made tools to the show and had them on display in the vendor marketplace. Seeing the tools in person only made Stumpy's ideas, and his skills, more impressive.

This book does an excellent job of describing 12 shop-made tools. Like most people who work wood I've knocked out a number of jigs over the years but Stumpy takes things to a level I'd never imagined. The amount of thought put into the details make his tools accurate and convenient. I think many readers will find at least one project (and quite probably more) they'll want to build.

Of course hearing Stumpy present his ideas in a live setting adds an element of humor and entertainment that no book could match. That's not a criticism of the book. It's an endorsement of attending one of his presentations.

Great for any woodworker!

By Todd Franek

I just recently discovered Stumpy Nubs on YouTube and was greatly impressed with the machines and jigs he has developed. I bought this book (Kindle version) mainly for the drum sander, but I think I will probably build most, if not all of the projects in the book. I read through half of the chapters and it is easy to follow and written with a sense of humor. This is a great book for any woodshop and I hope it is followed up with another book with more projects.

Great project book for the budget conscious woodworker

By SteveKY

I ordered this on Stumpy Nubs website, to support his work... That said, it is cheaper here. I did not expect more than an interesting read, I do enjoy his Videos on the internet.

This book pleasantly surprised me. I has five pages of background and the balance (166 pages) of project drawings. 12 shop machines that can be made for the home shop (or any shop). I plan to make probably half of them, only half because I have already made or purchased the other half.

This book is great for anyone interested in home woodworking with machines on a budget.
